

NO to CO₂lonialism!

This guide can be downloaded at: <http://www.earthpeoples.org/CLIMATE CHANGE/Indigenous Peoples Guide-E.pdf>

Indigenous Peoples' Guide FALSE SOLUTIONS TO CLIMATE CHANGE

Our planet is heating up at an alarming rate, threatening our very survival. What needs to be done is simple: The pollution and destruction of Earth must be stopped immediately. But instead, there is a lot of greed, false solutions and lies about how to save our future. It seems that leaders of the world are more concerned about making money than solving the climate crisis.

You have in your hands a quick guide to the truth about false solutions to climate change. These market-based scams allow polluters to avoid reducing their pollution, continue to destroy nature and make millions while they are at it. The United Nations, the World Bank, industry, multinationals, governments and even some NGOs promote this climate fraud. Could it be that crimes against humanity and the planet are being committed and nobody knows?

But what does all this have to do with Indigenous Peoples?

Unfortunately, most of these false solutions are violating not only the law of nature but also Indigenous Peoples' rights. Many of these so-called "solutions" to Climate Change are grabbing our land and devastating our territories. Indigenous Peoples need to know what's going on so that we can fight back.

"Capitalism is in deep crisis, but it still has a green card to play. Rather than taking effective action against climate change - which would mean a radical reduction of industrialized countries' emissions and questioning the forced growth of the capitalist system itself - they are reaping mega profits from biofuels and carbon trading. These market mechanisms and techno fixes will be a disaster for the poor, and will result in a new form of colonialism. They are already privatizing the atmosphere and subsidizing enormous corporate land grabs of peoples' lands and forests in the Global South. Instead of business as usual, emissions must be drastically reduced, which means that fossil fuels must stay in the ground." Oliver Demarcus, Youth Climate Advocate

THREE TYPES OF FALSE SOLUTIONS:

THE CARBON MARKET

MAKING MONEY FROM PRIVATIZING THE AIR - BUYING AND SELLING PERMITS TO POLLUTE

CLEAN DEVELOPMENT MECHANISM – CO₂LONIALISM

North buys permits to pollute from projects in the South

REDD – CO₂LONIALISM OF FORESTS

Uses forests and plantations to generate permits to pollute

DIRTY 'CLEAN' ENERGY

WHAT GOT US INTO THIS MESS IN THE FIRST PLACE

NUCLEAR ENERGY – RADIOACTIVE NIGHTMARE

MORE FOSSIL FUELS: "CLEAN" COAL

NATURAL GAS

HYDROGEN

BIG DAMS – CHOKER THE RIVERS & RELEASE EMISSIONS

AGROFUELS – FEED CARS NOT PEOPLE

PLAYING GOD

REAL WORLD SCIENCE FICTION -PRIVATIZING AND PERVERTING LIFE

GEO-ENGINEERING – WEATHER CONTROL FREAKS:

Ocean Fertilization, Ocean Pumps, Carbon Capture & Storage, Biochar

MAD SCIENTISTS:

GMOS

SYNTHETIC BIOLOGY

EXTREMOPHILES

ANNEX

TREE TALK: THE UN THINKS GMO TREE PLANTATIONS ARE FORESTS

UN CARBON MARKET PROJECTS VIOLATE INDIGENOUS RIGHTS

INDIGENOUS PEOPLES PROTEST THE UNPFII CLIMATE CHANGE REPORT

A DECADE OF INDIGENOUS PEOPLES' OPPOSITION TO THE CARBON MARKET

KEEPING IT REAL –TRUE SOLUTIONS TO CLIMATE CHANGE

SUMMARY OF THE THREE FALSE SOLUTIONS:

THE CARBON MARKET buys and sells permits to pollute called "carbon credits". It claims to solve the climate crisis but really just allows polluters to buy their way out of reducing their emissions. This multibillion-dollar pollution trading mechanism privatizes the air and commodifies the atmosphere. The International Indigenous Peoples' Forum on Climate Change opposes the carbon market. "We cannot condone activities that **defile the sacredness** of Mother Earth...Carbon trade-induced conflicts...**endanger our survival**..."

Northern polluters can also get permits to pollute through projects in the South like a dam or a tree plantation under the **Clean Development Mechanism** (CDM). The International Indigenous Peoples' Forum on Climate Change calls the CDM "**a new form of colonialism**." Permits to pollute could also soon be generated by promising not to cut down forests and plantations that absorb pollution. This is called Reducing Emissions from Deforestation and Degradation (REDD). The International Indigenous Peoples' Forum on Climate Change says "**REDD will not benefit Indigenous Peoples, but in fact, will result in more violations of Indigenous Peoples' Rights**...Under REDD, States and Carbon Traders will **take more control over our forests**."

*"Some of the biggest threats to indigenous peoples are the efforts to stop global warming"*¹ Cultural Survival

DIRTY "CLEAN" ENERGY (Nuclear Energy, "Clean" Coal, Natural Gas, Dams, Agrofuels and Hydrogen) - What got us into this mess in the first place is certainly not what's going to get us out! Fossil fuels and other energy sources that cause environmental devastation and violate human rights are being green-washed, labeled "clean" and wrongly called solutions to climate change. Indigenous Peoples worldwide have suffered from nuclear energy and nuclear testing, fossil fuel extraction, big dams and plantations. Now comes **more destruction in the name of saving the climate**.

PLAYING GOD - Let's dump tons of iron filings in the ocean, spray the stratosphere with banned sulfates, genetically modify trees and wrap the deserts in white plastic! Is that a way to save your children's future? Crazy schemes that sound like comic book science fiction are being implemented to sell permits to pollute and to try to modify the weather. Needless to say, **these climate change mitigation strategies corrupt the sacred**.

THE CARBON MARKET

Making Money from Privatizing the Air

FALSE SOLUTION

CARBON MARKET

includes:

Carbon Trading
Carbon Offsets
Emissions Trading
Cap and Trade
United Nations Kyoto Protocol
Voluntary Market
Clean Development Mechanism (CDM)
REDD

WHAT IS IT?

The Climate Fraud and Cover-up

- Buys and sells permits to pollute
- Claims to solve the climate crisis but really just allows polluters to buy their way out of reducing their emissions
- Trades “carbon credits” = permits to emit carbon dioxide (CO₂), a gas that causes global warming
- Makes money from the climate crisis
- Commodifies the Atmosphere & Privatizes the Air
- Business as Usual = hides that destructive production and consumption patterns are not changing

IMPLEMENTED OR NOT?

Yes. Carbon credits are traded between states, companies or individuals on exchanges in London, New York and Chicago and through the United Nations

WHY IS THIS A DISASTER FOR THE ENVIRONMENT?

Pretends to be a solution but is not. All False Solutions **increase climate change & global warming** because they **allow polluters to avoid cutting their emissions** at source and to keep polluting.²

- Fossil fuels continue to be burned
- Greenhouse gas emissions increase
- Makes money instead of cutting emissions
- Pushes the Amazon, Arctic and Antarctic to their “tipping point” = collapse from which they cannot recover³

PROBLEMS FOR INDIGENOUS PEOPLES

Indigenous Peoples are on the front lines of climate change.

THE CARBON MARKET AND OTHER FALSE SOLUTIONS:

- **do not reduce emissions**
- **intensify climate change** and cause conflicts thus **threatening the survival** of many of our peoples
- **Destroy the future**
- Violate the principle of the Seventh Generation
- Violate our birthright to life and a clean environment
- **Corrupt the Sacred**
- Hinder Mother Earth’s efforts to heal herself
- Violate UN Declaration on the Rights of Indigenous Peoples

HEAR THIS

International Indigenous Peoples’ Forum on Climate Change:

“We oppose the development of the carbon market... Carbon trade-induced conflicts...endanger our survival.”⁴

The Wall Street Journal:

Carbon trading makes “money for some very large corporations, but don't believe for a minute that this **charade** [will] do much about global warming.”⁵

Financial Times:

Carbon trading and offsets are merely a “**carbon smokescreen**.”⁶

European Commissioner for Energy: “A failure.”⁷

⁷ *Channel 4* www.channel4.com/news/articles/society/environment/eu+climate+change+plants+a+failure/281657

FALSE SOLUTION

Clean Development Mechanism (CDM)

WHAT IS IT?

CO₂lonialism⁸

- Created under the **United Nations Kyoto Protocol**
- Claims to compensate for pollution in the North with projects in the Global South that generate carbon credits
- CDM projects include tree **plantations**, large **dams**, destroying laughing gas⁹ and reducing cow and pig farts (no joke); very few on renewable energy; most have no effect on fossil fuel use
- **Outsources pollution** reduction of rich countries to poor countries
- **Pollution Shell Game**
- A North-South Carbon Offset

IMPLEMENTED OR NOT?

Yes, under the Kyoto Protocol. There are over 4000 projects in the CDM pipeline.¹⁰

WHY IS THIS A DISASTER FOR THE ENVIRONMENT?

Many CDM projects:

- **Destroy biodiversity**
- **Pollute**
- **Release Emissions**
- Dam rivers
- Flood ecosystems
- Promote industrial monoculture tree **plantations**
- Do no reduce fossil fuel use

PROBLEMS FOR INDIGENOUS PEOPLES

Indigenous Peoples are not only suffering from climate change but also from climate change mitigation strategies.

Some CDM projects have resulted in:

- **Armed conflict**
- **Forced relocation**
- **Servitude**
- **Repression**
- **Human rights violations**
- **Loss of land and territory**
- Loss of cultural identity
- Violation of the right to free, prior and informed consent
- **Violations of the UN Declaration on the Rights of Indigenous Peoples** especially Articles 10, 26, 27, 28, 29, 30, 32

HEAR THIS

International Indigenous Peoples' Forum on Climate Change:

"a worldwide strategy for **expropriating our lands, seas and territories** and violating our rights that would culminate in **a new form of colonialism**...lose our right to manage traditionally our lands and **become slaves of the carbon trade**." Statement to United Nations Framework Convention on Climate Change¹¹

Newsweek:

"**It isn't working**" . . . [and represents] "a **shell game**" which has transferred "**\$3 billion to some of the worst carbon polluters** in the developing world."¹²

MORE INFO

Carbon Market & the CDM violate Indigenous Peoples' Rights:

- In Panama, the **Kuna, Embera, Ngöbe Bugle and Naso Peoples** oppose carbon market projects and CDM **dams** and suffer. "...Dams and associated development have already caused **armed conflict**" See **Inter-American Human Rights Commission** Petition¹³
- **Climate of Terror:** Since 1998, more than **200 Indigenous Wayúu** have been **assassinated** to clear their territory for 8 mega-projects including **World Bank-funded CDM project**, the Jepirachi Wind Farm in Colombia¹⁴
- **Displaced Pygmy Batswa People** suffer **Servitude** on **World Bank-funded Tree Plantation**¹⁵
- See CDM chart in this brochure: **Snapshots of CO₂lonialism**

⁸ See Landmark Case Study on Carbon Colonialism in Uganda; *Norwatch* www.norwatch.no/download-document/19-co2lonialism.html

¹⁵ *International Alliance* www.international-alliance.org/documents/Climate%20Change%20-%20DRC.pdf (p. 57-58)

**FALSE SOLUTION****REDD** (Reducing Emissions from Deforestation and Degradation)**WHAT IS IT?****CO₂lonialism of Forests**¹⁶

- Created under the United Nations Framework Convention on Climate Change funded by the World Bank,¹⁷ governments, companies & NGOs; UN-REDD program and other REDD initiatives are in the works.
- Generates permits to pollute or “carbon credits” by promising not to cut down forests and plantations
- Includes forests in the carbon market
- Commodifies and privatizes forests —carbon traders will require legal title to the carbon in the forests or to the land
- Profits for loggers, deforesters & polluters¹⁸
- Reduces forests to mere carbon sequestration

IMPLEMENTED OR NOT?

Yes. Pilot projects are underway in at least 9 countries including war zones (DRC). Thirty countries are preparing Readiness Plans.

¹⁶ Palm oil's diffusion threatens native people, UN says <http://en.greenplanet.net/food/research/414-palm-oils-diffusion-threatens-native-people-un-says.html>

¹⁷ See protest against the World Bank Forest Carbon Partnership Facility <http://www.globaljusticeecology.org/gallery.php>

¹⁸ REDD-Monitor: World Bank REDD “Poster Child would Reward Forest Destroyers” www.redd-monitor.org

WHY IS THIS A DISASTER FOR THE ENVIRONMENT?

The United Nations defines forests in such a way that it includes plantations.¹⁹

- Monoculture tree **plantations** that were created by **destroying biodiversity, clear-cutting or burning forests** could be eligible for REDD money. Large monoculture tree plantations cause environmental and social **devastation**.
- The United Nations accepts the use of **GMO trees**²⁰ in plantations **Criminalize indigenous agriculture and lifestyles** for carbon credits

PROBLEMS FOR INDIGENOUS PEOPLES

Most of world's forests are on Indigenous Peoples' land.

REDD could result in:

- **Massive land grabs** in the name of saving the climate
- **Violations of the UN Declaration** on the Rights of Indigenous Peoples especially Articles 10, 26, 27, 28, 29, 30, 32
- **United Nations admits REDD could:**²¹
- **Violate Indigenous Peoples' rights**
- Result in the **loss of access to land**
- “Marginalize the landless”

HEAR THIS**International Indigenous Peoples' Forum on Climate Change:**

“REDD will **not benefit Indigenous Peoples**, but in fact, it will result in more violations of Indigenous Peoples' Rights. It will increase the **violation of our Human Rights**, our rights to our lands, territories and resources, steal our land, cause **forced evictions**, prevent access and threaten indigenous agriculture practices, destroy biodiversity and culture diversity and cause social conflicts. Under REDD, **States and Carbon Traders will take more control over our forests.**”²²

REDD Myths Exposed: “REDD could unleash **a devastating wave** of further **forest loss, land grabbing, corruption, cultural destruction and conflict.**” Indigenous Peoples “risk displacement, violence and lost of livelihoods.”²³

DIRTY “CLEAN” ENERGY

What got us into this mess in the first place

FALSE SOLUTION

NUCLEAR ENERGY

WHAT IS IT?

Radioactive Nightmare

Nuclear energy is released by the splitting (fission) or merging together (fusion) of the nuclei of atom(s).²⁴

- Emits less CO₂ but causes cancer
- **Currently 400 nuclear reactors** in the world; proposed **increase to 17,000** to “combat climate change”

WHY IS THIS A DISASTER FOR THE ENVIRONMENT?

Nuclear energy increases **nuclear weapon proliferation**, the arms race and nuclear bomb testing.

- More **Nuclear Accidents & Meltdowns** like Chernobyl & Three Mile Island
- Lethal **Nuclear Waste** for **100,000 years**
- Radioactive **contamination** of people, land, water & crops
- Irresolvable problem of **radioactive waste, storage & transportation**
- **Unsafe sites** of reactors and waste storage i.e. faults prone to earthquakes

PROBLEMS FOR INDIGENOUS PEOPLES

Indigenous Peoples have suffered the most from nuclear bomb testing, uranium mining, radioactive waste dumps and have even been subjected to experiments with radioactive material without their informed consent.²⁵

- **700 nuclear bomb tests** detonated on Western Shoshone territory
- **70% of uranium mines** are on **indigenous land**²⁶
- Death, **cancer, birth defects & radiation sickness**
- Violates our birthright to a healthy life and a clean environment
- Corrupts the Sacred & **Disrupts the Balance**
- **Violates UN Declaration** on the Rights of Indigenous Peoples

FALSE SOLUTION: MORE FOSSIL FUELS

“Clean” Coal” – Greenwash the Biggest Contributor to Global Warming

WHAT IS IT?	Environment	Indigenous Peoples	HEAR THIS
• A fossil fuel • Coal: • Biggest contributor to global warming • Largest source of CO₂ • Pollutes more than oil, natural gas & gasoline • “Clean” Coal: • Gasifies coal & burns gas • Installs filters on chimneys	• Emits less sulfur than “unclean” coal but same amount of CO₂ & mercury • Air Pollution & smog • Mercury Poisoning • Acid Rain • Devastates ecosystems • Strip Mining • Mountain-top removal • Toxic Waste & Spills • Wastes Water	• Displacement²⁸ • Death from pollution - Coal-fired power plants lead to 24,000 deaths in US • Asthma, heart disease, emphysema, lung cancer, mercury poisoning, childhood leukemia • Rips the liver out of Mother Earth	• Coal-fired power plants are “death factories”²⁹ • Coal mining is “destroying our lives”³⁰ • Coal is the “dirtiest energy source”³¹ 

Natural Gas – Methane is Ten Times Worse for the Climate than CO₂

• A fossil fuel • Mostly methane • Mostly found in oilfields, coal beds, natural gas fields & landfills	• Devastation of fossil fuel exploitation • Methane is a 10 times more potent greenhouse gas than CO₂ • When burned, emits CO₂ emissions (less than coal or oil) • When drilled, the CO₂ pumped out is released into the atmosphere • Explosions	• Same problems as fossil fuel exploration and exploitation • Natural gas flares are part of genocide against Ogoni People in Niger River Delta • Some Gas Flares have burned for more than 30 years³² • Oil is the blood of Mother Earth	• “Threatens Indigenous Peoples in Voluntary Isolation”³³ • Movement for the Survival of the Ogoni People: “More gas is flared in Nigeria than any other place in the world.”³⁴
---	---	---	--

Hydrogen – Dirty, Expensive and Inefficient (in experimental phase)

• Hydrogen is separated by “reforming” natural gas, a fossil fuel or extracting it from agrofuel or water • Hydrogen is stored in fuel cells • It takes 3,000 times more storage space than gasoline	• Mostly from fossil fuels • Hydrogen might take more energy to extract & deliver than it actually supplies • Dangerous to store & transport • Hydrogen gas is invisible – even when it is on fire	• Same problems as fossil fuel exploration and exploitation:³⁵ • Loss of Land • Threatens Cultural Survival • Human Rights Violations	• In the US, “95% of hydrogen is produced from natural gas, a fossil fuel” • A hydrogen car costs \$1 million • To extract hydrogen from water wastes 4 times the amount of electricity than what the hydrogen yields³⁶

FALSE SOLUTION

BIG DAMS

WHAT IS IT?

Choke Rivers and Release Emissions

- Claim to reduce emissions but are actually **Sources of Emissions** because CO₂ and methane are released when organic material in reservoirs rots and when water goes through turbines and travels downstream; especially in hot climates³⁷

WHY IS THIS A DISASTER FOR THE ENVIRONMENT?

50,000 large dams choke more than half of the world's major rivers. So much water is dammed that it has **changed the axis of the planet.**

- Source of Emissions**
- 25% of human-caused methane emissions are from dams
- Destroys Biodiversity**
- Destroys freshwater systems

PROBLEMS FOR INDIGENOUS PEOPLES

HEAR THIS

MORE INFO

Indigenous Peoples throughout the world struggle against large hydroelectric projects because they often cause:

- Displacement** and **Forced Relocation**
- Loss of land** and **flooding of territory**
- Violence including **massacres** and **armed conflict**³⁸
- Loss of livelihood**, food & income
- Loss of sacred places** & cultural identity
- Human rights violations including violations of UNDRIPs

International Herald Tribune & Associated Press:

“The climate does not gain, but loses.”

444 Mayans were massacred by the military for resisting construction of the **Chixoy Dam**, Guatemala, 1982, www.internationalrivers.org/featured/444/461

- “Latin American Network against Dams www.redlar.org

FALSE SOLUTION

AGROFUELS or BIOFUELS

WHAT IS IT?

Feeds Cars not People³⁹

- Makes ethanol or diesel **from food** crops, plants, GMOs and trees
- “First generation agrofuels” are made from plants (like corn, soy, sugar, and switchgrass). “Second generation agrofuels” are made from from trees (wood or cellulose)

IMPLEMENTED OR NOT?

Yes, for first generation agrofuels. Second generation agrofuels are still in the experimental phase.

WHY IS THIS A DISASTER FOR THE ENVIRONMENT?

Promotes massive monoculture **plantations.**

Plantations are a leading **driver of deforestation** and **destroy biodiversity.**

- More emissions than fossil fuels**⁴⁰
- Agro-toxins** contaminate water and deplete soil
- GMOs** are used
- Wastes Water**⁴¹

PROBLEMS FOR

Plantations are notorious for causing human rights abuses.

Agrofuel plantations have resulted in:

- Forced relocation**
- Slave Labor** in Brazil
- Social Conflicts** and **violence**⁴²
- Less land for food crops**, **higher food prices**, hunger, less food relief for starving⁴³
- Violations of the UN Declaration on the Rights of Indigenous Peoples
- If wood-based agrofuels are commercialized, **these abuses will increase.**

HEAR THIS

International Indigenous Forum on Biodiversity

“We reject genetically modified seeds, biofuels, marine fertilization experiments, monoculture tree plantations & other climate change mitigation and adaptation models because they **destroy our lands**, territories and resources and cause the **displacement** & **forced relocation** of our peoples.”⁴⁴

The New York Times:

PLAYING GOD

Real World Science Fiction: Privatizing & Perverting Life

FALSE SOLUTION: GEO-ENGINEERING

Geo-Engineering – Weather Control Freaks			
WHAT IS IT?	Is this really happening?	Environment	Indigenous Peoples
Pretends to combat the effects of climate change by: • Modifying weather systems • Macro-manipulation of environmental systems	Yes , research attempted by the private sector, NASA and research institutes	Proposals include: • Ocean Fertilization • Launching millions of tiny mirrors into space to reflect sunlight • Wrapping deserts in white plastic • Spraying banned sulfate aerosols into the stratosphere	• Nobel Laureate predicts 500,000 deaths from increased particulate pollution if sulfate aerosols used⁴⁷ • Indigenous Peoples who depend on a geo-engineered ecosystem, like the ocean or the sky could be very adversely impacted • Corrupts the Sacred
Ocean Fertilization – Poison the Sea			
• Generates carbon credits by dumping tons of iron filings or urea (piss) into the ocean to promote algae blooms that supposedly absorb CO₂ and eventually sink to the bottom of the ocean	Yes , Dump in Scotia Sea off of Argentina (2009) • New dumps planned in Australia and US • Experimental dumps blocked in Ecuador and the Philippines	• Alters acidity of the ocean • Could increase red tides • Could increase ocean “dead zones” • Unknown impacts on marine ecosystems, fish and mammals as well as fishing and coasts	International Indigenous Forum on Biodiversity “ We reject...marine fertilization experiments ” ⁴⁸ • Current dumps violate global moratorium agreed to Convention on Biological Diversity⁴⁹ • Corrupts the Sacred
Ocean Pumps - Vacuum the Ocean			
• Generate carbon credits by tethering 100 million vertical pipes across the ocean to pump nutrient rich water to the surface • Claims that the nutrients would fertilize algae that capture CO₂	Experimental phase	• Nutrient-rich water from the sea’s depths are also CO₂-rich and could result in emissions • Its chief proponent admits that it could make matters worse. “...CO₂ is released into the atmosphere”⁵⁰	• Indigenous Peoples who depend on the ocean for their livelihood could be very adversely impacted • Corrupts the Sacred

⁴⁷ Paul Crutzen as quoted in “Hoodwinked in the Hothouse” www.risingtidenorthamerica.org/special/fsbooklet.pdf

⁴⁹ Ocean Fertilization Dumps Violate Global Moratoria www.etcgroup.org/en/materials/publications.html?pub_id=719

⁵⁰ *New Scientist* www.newscientist.com/article/dn12698

FALSE SOLUTION: GEO-ENGINEERING

Carbon Capture and Storage (CCS) – Pump Pollution into Rocks			
WHAT IS IT?	Is this really happening?	Environment	Indigenous Peoples
• Compresses CO₂ and tries to store it in the sea bed, empty aquifers, mines, drill sites, caves and peridotite mantle rock	Experimental phase	• New toxic waste dumps underground • Threat of leakage and escape of CO₂, hazardous gases, toxic metals & contamination of soil, water, sea • Other environmental impacts unknown	Institute of Science in Society: “CCS is certainly not a solution for mitigating climate change.” ⁵¹ • Exposure to toxic hazardous flue gases • Toxic contamination • Other impacts for humans unknown
Biochar – Burn Trees & Bury Charcoal			
• Charcoal created by burning biomass (mostly wood) in an oxygen-free vacuum is buried in the earth • Claims to increase soil productivity and soil’s capacity to store carbon dioxide thus generating carbon credits • Plans to be done on a massive scale (over half a billion hectares of tree plantations) and to use a by-product of second generation agrofuel production • Could include soils in carbon trading and offset mechanisms	On small, local scale only; not on large scale yet	• Requires enormous amounts of biomass (mostly from trees) • Vast areas of land would have to be converted to monoculture plantations to produce enough biomass • Could speed up agrofuel production, a leading driver of deforestation and ecosystem destruction	Chair of Board International Biochar Initiative : “...there are no long-term experiments to suggest that biochar actually sequesters any carbon in the ground or that it makes soil more fertile.” ⁵² BEST Energies “We are well positioned to win the current land grab in next-generation fuels” Could result in: • Forced Relocation and Displacement • Loss of land, livelihood & culture • Human rights abuses • Favors plantation, forestry and “bio-energy” companies

⁵² Biochar is “a very dangerous false solution” Its promoters blatantly disregard the human rights abuses that are occurring as a result of global expanded demand for biomass ” www.globaljusticeecology.org/stopnotrees_news.php?ID=159

GMOs – Pervert, Privatize & Patent Life			
WHAT IS IT?	Is this really happening?	Environment	Indigenous Peoples
• Perverts & Privatizes Genetic Material GMO = Genetically Modified Organisms = Genetically Engineered • Alters the genetic material of living beings in ways that could not happen in nature. • Some GMOs are created by transferring genetic material from one species to another (i.e. inserting fish genes in strawberries)⁵³ • Commodifies & Patents Life	• Yes • GMOs in 75% of US packaged food • No labeling • Monsanto tries to criminalize seed saving⁵⁴ • Animals have been genetically engineered and cloned including sheep⁵⁵	• Threats to food, agriculture & environment • GMO contamination i.e. GMO corn contamination in Mexico, the center of origin or “birthplace” of this sacred grain⁵⁶ • Kills other species (i.e. monarch butterflies killed by GMO corn pollen)⁵⁷ • Impacts of GMOS on humans not well known	• Biocolonialism: • Biopiracy, bioprospecting, patenting & perverting genetic resources of Indigenous Peoples including blood • Corrupts Sacred • Resistance: • <u>Indigenous Peoples Council on Biocolonialism</u>⁵⁸ • Mayan Traditional Doctors and Midwives kick US biopirates out of Chiapas ⁵⁹
GMO Seeds – Frankenstein Seeds aka “Climate Ready” Crops			
• Perverts & Privatizes Seeds • Claims to deal with climate change by genetically engineering seeds to be resilient to extreme environmental conditions, drought, flood, etc. • Increases corporate power of seed companies like Monsanto • “Terminator” Technology=Seeds that are genetically modified to be sterile could be applied to “climate ready” crops	• Yes 	• Privatizing stress-resistance in crops could restrict farmers trying to adapt their crops locally to changing conditions, thus causing crop failure & hunger • Other threats to food, agriculture and the environment including GMO contamination	• <u>International Indigenous Forum on Biodiversity</u> (IIFB) “We also call for the termination of terminator and genetic modification technologies. We urge Parties and international organizations . . . to outlaw the patenting of knowledge and seeds.”⁶⁰ • Corrupts Sacredness of Seeds and Food
GMO Trees – Frankenstein Trees aka “Second Generation Agrofuels”			
• Perverts & Privatizes Trees • Claims to deal with climate change by genetically engineering trees for agrofuel production (& perhaps soon for carbon sequestration) • Claims to genetically engineer trees for a variety of traits including faster growth, cold tolerance, less lignin and to manufacture wood-based agrofuels • When the carbon market uses GMO trees, Privatization of the Sky intersects with Privatization of Life	• Yes. Field trials in over 15 countries. China commercialized GMO trees, US and Brazil hope to soon. • UNFCCC accepts the use of GMO trees in plantations for carbon credits	• GMO trees can contaminate native trees over 1,000 kilometers away with highly destructive and unnatural traits (like the ability to kill insects). This impacts the wildlife that depends on those insects (such as songbirds) in an ever-widening circle of destruction. • Some GMO trees can contaminate for more than 100 years.	• Could devastate native forest ecosystems globally • Escape of GMO tree seeds or pollen into the wild, which is considered inevitable if they are commercialized, is irreversible. • Due to the low-lignin GMO trait, contaminated trees would be useless as shelter or firewood • Sterile GMO trees produce no fruit or nuts • Corrupts Sacredness of Trees - IIFB: “We reiterate our call for a moratorium on GMO trees.”⁶¹

Nano Technology & Nano Trees – Frankenstein Molecules			
WHAT IS IT?	Is this really happening?	Environment	Indigenous Peoples
• Perverts & Privatizes atoms and molecules which are the building blocks of nature • Manipulates natural materials on the scale of atoms and molecules to change their physical characteristics and essence • Claims to deal with climate change by reducing energy needs with nano solar cells and batteries, water purification systems, lighter planes, etc.	• Yes - Nanomaterials are on the market as ingredients in foods & cosmetics - Nanomaterials are not labeled - Nanotech is experimented with in trees⁶²	• Impacts on the environment unknown. Scientific research suggests nano tech could be harmful for the environment. • Nanomaterials can move in the environment and in our bodies in unpredictable ways • May produce a new kind of pollution that we can't see, track or measure.	• Impacts on humans unknown • Scientific research suggests nano tech could be harmful for human health • Corrupts the Sacred • Nano in Food, Agriculture & Skin Creams⁶³
Extremophiles – Patents Power Source			
• Privatizes & Patents microorganisms • Claims to harness power generated by micro-organisms found in extreme environments such as volcanoes and hot sulfur vents on the ocean floor⁶⁴	Experimental phase, Bioprospecting in process	• Potential impacts unknown	• More bioprospecting & patenting • Potential impacts unknown
Synthetic Biology – Land Grab for Fake Oil			
• Uses engineered bacteria to ferment plant sugars to make petroleum, pharmaceuticals and plastics • Patents synthetic life	Experimental phase	• Could create a colossal demand for plant-based sugars leading to an unprecedented plant-grab (and land-grab) • Could repeat the debacle of first-generation agrofuels and worsen the climate and water crisis by intensifying industrial agriculture	• Could: • Endanger livelihoods and human rights • Drive up food prices • Displace small farmers and indigenous peoples • Increase commodification of life • Make a mockery of biosafety
Coming Soon? Patents on Traditional Knowledge on Climate Change and Adaptation There is a lot of interest in Indigenous Peoples' traditional knowledge systems on climate change and adaptation. Efforts to collect this traditional knowledge, put it in databases, patent it and sell it may be afoot. Look sharp!

TREE TALK

WARNING:

GENETICALLY ENGINEERED TREE PLANTATIONS A FALSE SOLUTION THAT THREATENS FORESTS & FOREST PEOPLES

The **United Nations definition of forests** comes from the United Nations FAO Forest Resources Assessment of 2000. According to the FAO, a forest consists of tree canopy cover of 10% or more. The trees should be able to reach a minimum height of 5 meters at maturity. There is no mention of biodiversity. This means that a **monoculture tree plantation can be considered a forest**.

*Forest Resource Assessment (FRA) 2000 was the first global forest assessment to use a common definition for all forests worldwide. Previous assessments used a minimum canopy cover threshold of 10 percent for developing countries and 20 percent for industrialized countries to define forests, based in part on past forest inventory practices in the two domains. When the results of FRA 1990 were reviewed, a number of experts suggested that the next global assessment should use a common forest definition for all regions. Following a consensus recommendation of the IPF, it was decided that FRA 2000 would use the **10 percent minimum canopy threshold for all countries**. (That is, when observed from above, at least 10 percent of the land area is covered by forest canopy. "Other wooded land" has a canopy cover between 5 and 10 percent).⁶⁵*

Furthermore, in COP9, the UNFCCC decided that **genetically modified trees** can be **used in plantations for carbon credits**. Reforestation is planting trees where there were trees previously and afforestation is planting trees where there were no trees previously (usually on grassland). Both **reforestation and afforestation can be plantations** and do not have to have to include forest ecosystems or biodiversity.

*Recognizing that host Parties evaluate, in accordance with their national laws, potential risks associated with the use of genetically modified organisms by afforestation and reforestation project activities and that Parties included in Annex I evaluate, in accordance with their national laws, the use of temporary certified emission reductions and/or long-term **certified emission reductions generated from afforestation and reforestation project activities that make use of genetically modified organisms**.⁶⁶*

In the REDD decision,⁶⁷ there is no mention of biodiversity, meaning that any afforestation or reforestation efforts taken under **REDD** do not have to take into account biodiversity - in other words, REDD "forests" **can be genetically modified tree plantations**.

SNAPSHOTS OF CO₂ LONIALISM:

Carbon Market & UN Clean Development Mechanism Projects violate Indigenous Peoples’ Rights

HUMAN RIGHTS VIOLATIONS INCLUDE: KILLINGS, SERVITUDE, FORCED RELOCATION, ARBITRARY DETENTION, LOSS OF LAND & TERRITORY, LOSS OF INCOME, LIVELIHOOD AND FOOD, DESTRUCTION OF HOMES & CROPS, AND THREATS TO CULTURAL SURVIVAL.

Bayano Dam Hydroelectric Expansion & Upgrade Project, Panama		
Project Status	Environmental Impacts	Problems for KUNA & EMBERA PEOPLES ⁶⁸
Clean Development Mechanism Project CDM status: at validation ⁶⁹ Dam already built	•Dams, especially in tropical countries are actually sources of emissions because CO ₂ and methane are released when organic material in reservoirs rots and when water goes through turbines and travels downstream, especially in the tropics ⁷⁰ •Releases CO ₂ and Methane •Destroys biodiversity & aquatic life •Destroys river ecosystems •Caused deforestation • “Non additional” = would have been built regardless of the CDM	•Forced Relocation •Flooded 80% of Kuna central Territory •Illegal Invasion of non-flooded lands by peasants •Loss of Livelihood •Waterborne Illnesses •No Free, Prior Informed Consent (FPIC) • Inter-American Commission on Human Rights hearing •Non-compliance with World Commission on Dams guidelines
Chanquinola Dam Hydroelectric Project (Chan 75), Panama Mesoamerican Biological Corridor, La Amistad International Park		
Project Status	Environmental Impacts	Problems for NGÖBE BUGLE PEOPLE ⁷¹
Clean Development Mechanism Project CDM status: at validation ⁷² Dam under construction	•Potential Source of Emissions (see above) •Endangers Biodiversity Hotspot •Endangers UNESCO World Heritage Site •Destroys river & forest ecosystems •Disrupts food chain •Blocks fish and shrimp migration from San San Pondsak Ramsar Wetlands site • To offset AES coal-fired power plant in USA. ⁷³ Coal-fired power plants are infamous for being sources of mercury poisoning, acid rain, asthma, lung cancer, CO ₂ emissions and global warming.	•Armed Repression from police & company •Forced Relocation of more than 1,000 •Arbitrary Detention & Beatings •Public Humiliation, Intimidation & Coercion •Loss of Livelihood for 4,000 •No FPIC & Coercion (Persons who do not read or write forced to sign documents in foreign language) •Illegal Destruction of homes & crops •Denounced by UN Rapporteur on the human rights and fundamental freedoms of Indigenous Peoples •Fraud in CDM Documents •CDM registration could intensify repression

Bonyic Dam Hydroelectric Project, Panama		
Project Status	Environmental Impacts	Problems for NASO PEOPLE ⁷⁴
Clean Development Mechanism CDM status: Submission Pending Dam under construction	•Potential Source of Emissions •Will destroy biodiversity •Will harm two watersheds •(See above for other dam impacts)	•Armed Conflict •Threatens endangered Indigenous People (There are only approx. 3,000 Naso.) •Police occupation & harassment •Traditional political structure & decision-making process not respected •Community divided by project •Leaders persecuted, arrested & jailed •Threatens Cultural Survival •Will flood 3,500 acres •Land rights not recognized
Jepirachi Wind Power Farm, Colombia		
Project Status	Environmental Impacts	Problems for WAYÚU PEOPLE ⁷⁵
Clean Development Mechanism CDM status: Registered UNFCCC reference number: 0194	•Very few Wayúu communities have electricity. ⁷⁷ Much of the energy generated from the wind farm is for the world’s largest open-pit coal mine, El Cerrejón, a source of emissions. •Coal is the dirtiest fossil fuel •Coal is a major contributor to global warming •Coal causes: acid rain, mercury poisoning, toxic waste, toxic spills, air pollution & illnesses •Coal mining devastates ecosystems and wastes water	•Climate of Terror: Since 1993, more than 200 Wayúu have been assassinated to clear Wayúu territory for 8 mega-projects including the World Bank-funded Jepirachi Project. ⁷⁸ •Paramilitary groups are active in Wayúu Territory and Wayúu leaders still receive death threats. ⁷⁹ •In October 2008, the Mayor of Uribia denounced that “the Kasiwoluin community where the wind farm is located still does not have electricity.” •Much of the energy generated from the wind farm is for El Cerrejón, the world’s largest open-pit coal mine. (which has a terrible record of human rights abuses including forced displacement and environmental destruction and is itself a source of emissions). ⁸⁰

THE UNITED NATIONS PERMANENT FORUM ON INDIGENOUS ISSUES (UNPFII) CLIMATE CHANGE REPORT CALLS CLEAN DEVELOPMENT MECHANISM (CDM) “GOOD EXAMPLES OF PARTNERSHIPS WITH INDIGENOUS PEOPLES”⁸⁷

Indigenous Peoples Protest Carbon Trading at UNPFII

PRESS RELEASE May 3rd, 2008⁸⁸

Indigenous Peoples attending the Permanent Forum are outraged that their rejection of the carbon market has been ignored in the final report of the 7th Session of the United Nations Permanent Forum on Indigenous Issues (PFII). The final report of the PFII hails World Bank funded carbon trading, like the Clean Development Mechanism, as “good examples” of partnership despite the human rights violations and environmental destruction they have caused. “Indigenous Peoples attending the 7th session of the Permanent Forum are profoundly concerned that our key recommendations on climate change are not being taken into account by the Permanent Forum.

“This Permanent Forum was created precisely to recognize, promote, and support the rights of Indigenous Peoples,” says Florina Lopez, Coordinator of the Indigenous Women’s Biodiversity Network of Abya Yala. Throughout the two weeks of the Permanent Forum, Indigenous community representatives have consistently testified about the injustices associated with the Clean Development Mechanism projects and have asked that the Permanent Forum not promote the projects. However, in the final report of the Permanent Forum adopted today, these injustices have been ignored.

In response, many groups under the name of the Indigenous Caucus of Abya Yala took the floor today to express their concerns. Their statement affirmed that the recommendations of the Permanent Forum do not properly reflect their positions. They used the opportunity to affirm their rejection of carbon trading mechanisms and concerns over specific implementations. Over 30 organizations at the forum called for the final report to include a section outlining their concerns.

In the background paper for this session (Document E/C.19/2008/10), three projects are being upheld to illustrate the “Clean Development Mechanism projects that are being implemented in Indigenous Peoples’ territories with good results.” However, there are grave problems with each of these projects including violations of the rights enshrined in the UN Declaration on the Rights of Indigenous Peoples. For example, the Jeripachi wind power project in Colombia did not get the free, prior, and informed consent of the Wayuu people to build this wind farm in a sacred territory of the Wayuu People. Indigenous Peoples’ organizations contend the assassination of over 200 Wayuu People prior to the implementation of the project was to clear the area for this and other projects. Additionally, most of the energy generated from the wind farm is used to power the Cerrejon mine, the biggest open air coal mine in the world, which itself is known for numerous human rights violations and environmental damages. Representatives of the Wayuu people who attended the Permanent Forum didn’t even know the project was being promoted as a good example.

“In promoting the Clean Development Mechanism projects and carbon trading, the Permanent Forum is allowing oil companies who are the biggest emitters for greenhouse gases, to continue to pollute,” says Tom Goldtooth, Executive Director of the Indigenous Environmental Network. “Promoting the commodification of the air is a corruption of our traditional teachings and violates the original instructions of Indigenous Peoples.”

REDD- Indigenous Peoples "2nd MAY REVOLT" at the UNPFII

5:28 / 9:55

To watch News Reel Video:

"Indigenous Peoples "2nd MAY REVOLT" at the UNPFII
<http://www.youtube.com/watch?v=UtORVi7GybY>

Chief Seattle, January of 1854:
[Version 3 edited by professor Ted Perry]

Washington sends word that wishes to buy our land. The Great Chief also sends us words of friendship and goodwill. This is kind of him, since we know he has little need of our friendship in return. But we will consider your offer. For we know that if we do not sell, the white man may come with guns and take our land.

How can you buy or sell the sky, the warmth of the land? The idea is strange to us. ..

The Sky is Sacred

INDIGENOUS PEOPLES’ DECADE LONG STRUGGLE AGAINST THE CARBON MARKET

THE FOLLOWING CHART IS A HISTORIC RECORD OF THE DECADE LONG OFFICIAL OPPOSITION OF THE INTERNATIONAL INDIGENOUS PEOPLES’ FORUM ON CLIMATE CHANGE (IIPFCC) AGAINST THE CARBON MARKET. IIPFCC IS THE CAUCUS OF INDIGENOUS REPRESENTATIVES FROM ALL REGIONS OF THE WORLD IN THE UN CLIMATE CHANGE NEGOTIATIONS UNDER THE UNITED NATIONS FRAMEWORK CONVENTION ON CLIMATE CHANGE (UNFCCC) AND THE KYOTO PROTOCOL.

UN Meeting	International Indigenous Peoples’ Forum on Climate Change
United Nations Framework Convention on Climate Change (UNFCCC), SBI and SBSTA Lyon, France 2000	“We oppose the development of the carbon market.” “We cannot condone activities that defile the sacredness of Mother Earth.” “Our philosophy and cosmovision require us to condemn the inclusion of sinks in the Clean Development Mechanism (CDM). Sinks in the CDM would constitute a worldwide strategy for expropriating our lands, seas and territories and violating our rights that would culminate in a new form of colonialism . Through sinks projects, we would lose our right to manage traditionally our lands and become slaves of the carbon trade . Carbon trade-induced conflicts, such as violence for access to basic resources would endanger our survival as peaceful peoples of the land. ”
UNFCCC COP6 The Hague, The Netherlands 2000	“...coal and uranium mining, logging, nuclear and large hydroelectric power station and oil and gas extraction... contribute to climate change and the destruction of our territories. ”
UNFCCC COP6bis press release Bonn, Germany 2001	“Indigenous Peoples Condemn Carbon Sinks in the Kyoto Protocol as a New Form of Colonialism and Genocide ” “These negotiations have churned out more than 5 million words of text but do not even mention Indigenous Peoples’ rights.”
UNFCCC COP7 Marrakech, Morocco 2001	“...some climate change mitigation strategies could threaten the survival of our peoples and communities. The inclusion of carbon sinks in the Clean development Mechanism (CDM) will constitute a dangerous tool for the expropriation of our lands and territories and culminate in a new form of colonialism. ”
UNFCCC COP8 New Delhi, India 2002	“We affirm our previous declarations of the First International Forum of Indigenous Peoples on Climate Change at Lyon, France in September 2000, Declaration of the Second International Indigenous Peoples on Climate Change, The Hague, November 2000, and the Indigenous Peoples’ Statement at Seventh Conference of the Parties at Marrakech, Kingdom of Morocco, 5 th November 2001...”
UNFCCC COP9 Milan, Italy 2003	“Sink projects do not contribute to climate change mitigation or sustainable development...The modalities and procedures...under the CDM do not respect and guarantee our right to our lands, territories and self determination. ”
UNFCCC COP10 Buenos Aires, Argentina 2004	“We are in crisis. We are an accelerating spiral of climate change increasingly getting worse due to the conditions that industry, multinationals and governments impose on our communities and the world.”
UNFCCC COP11 Montreal, Canada 2005	“The modalities and procedures for activities under the Clean Development Mechanisms (CDM) do not respect and guarantee our right to lands, territories, and self-determination . CDM and sinks projects do not contribute to climate change mitigation and sustainable development...Indigenous Peoples have experienced systematic and repeated violations by oil, gas, mining and energy industries infringing on our inherent right to protect our traditional lands. We reaffirm previous Indigenous climate declarations. ”
UNFCCC COP12 press release Nairobi, Kenya 2006	“Indigenous Peoples are concerned about the impacts of carbon sinks projects in the Clean Development Mechanism on our lands and communities... projects in indigenous territories must respect our fundamental rights...”
UNFCCC COP13 Bali, Indonesia 2007	“We demand that the Conference of Parties...refrain from adaptation and mitigation schemes and projects ...that devastate Indigenous Peoples’ lands and territories and cause more human rights violations, like market based mechanisms, carbon trading, agrofuels and especially avoided deforestation (REDD).”
UNFCCC SBSTA Statement on REDD Bali, Indonesia 2007	“REDD [forests in the carbon market] will not benefit Indigenous Peoples, but in fact will result in more violations of Indigenous Peoples’ rights. It will increase the violation of our Human Rights, our Rights to our lands, territories and resources, steal our land, cause forced evictions, prevent access and threaten indigenous agricultural practices, destroy biodiversity and cultural diversity and cause social conflicts. Under REDD, States and Carbon Traders will take more control over our forests. ”
UNFCCC COP14 High Level Segment Poznan, Poland 2008	“...stand by our demand for an immediate suspension of all REDD initiatives and carbon market schemes. ...“human rights violations caused by the CDM and other carbon trading and offset regimes... Cut emissions at source – No REDD ... The CDM and the carbon market are instruments that commodify the atmosphere...It is not just “carbon” or pollution that is being traded, but people’s lives.

KEEPING IT REAL

True Solutions to Climate Change

Real Solution: Honor the Earth & the Sky

- Drastically Cut Emissions at Source⁸⁹
- Transition to sustainable models of production, consumption & development
- Promote sustainable family farming, organic faming, perennial pastures
- Promote a paradigm shift
 - Planet and People not Profits
 - Ethical Leadership instead of corruption and thievery
 - Honor the Earth and Sky & Respect the Law of Nature
- Leave fossil fuels in the ground
 - Swiftly phase out fossil fuel exploration & extraction
 - Cut \$200 billion/year subsidies to coal & oil
- Promote renewable energy
- Scale down: Promote local sustainable energy solutions
- Reduce, reuse, recycle
- Phase out extractive industries
- Redirect military budgets; Stop war; Promote peace
- Pay ecological debt and cancel foreign debt to address climate crisis
- Promote peoples' sovereignty over energy, forests, land and water
- Ensure rights-based resource conservation
- Implement the UN Declaration on the Rights of Indigenous Peoples
- Demarcate and protect Indigenous Peoples' territories
- Promote food sovereignty and food security
- End deforestation and its underlying causes
- Promote energy-efficient modes of transportation and specifically public transportation

How emissions are cut is just as important as any percentages that are thrown around. There is no substitution for huge emissions cuts at source. So-called emissions cuts that allow for carbon market mechanisms, false solutions and "cooking the books" emissions accounting do not result in real emissions reductions. According to the United Nations "Intergovernmental Panel on Climate Change in 1990, in order to stabilize atmospheric concentrations at a level less than double that of pre-industrial times, greenhouse gas emissions would have to be reduced by 60-80%." The Kyoto Protocol purports to cut GHG only 5.2% but it has such giant loopholes that it may represent a net GHG increase.
