

For a new normal - a just and kind society - we demand from the government:

1. more state funding and better systems to support and protect all paid and unpaid workers, especially essential service providers, for the long term,
2. a Universal Basic Income with tax reforms to ensure the rich contribute their fair share to public good and ensure financial stability for all,
3. more support for relocalising of our economy to build community resilience and reduce greenhouse gas emissions,
4. more healthy, sustainable state housing alongside capital gains and asset taxes, mortgage rate and rent price controls, and stronger tenant protection, and
5. that the NZ Reserve Bank finances all Covid-19 recovery needs, not borrowing from commercial banks, and the introduction of sovereign money to set us free from a debt-based banking system.
